

# Faten Aljohani

## Software Engineer

Al Madinah Munawwarah, Saudi Arabia • [\(+966\)562232550](tel:+966562232550) • [fataljohani60@gmail.com](mailto:fataljohani60@gmail.com)

### SUMMARY

Software Engineering graduate with hands-on experience in Application Support, system analysis, and Oracle-based environments through cooperative training and the Tamheer program. Skilled in troubleshooting and ITSM systems, with growing expertise in Software Testing (QA), Frontend development, and [ASP.NET](#) Core. Passionate about building reliable systems and improving user experience..

### EXPERIENCE

#### Prince Sultan Armed Forces Hospital (Communications & IT Department) | Medina, Saudi Arabia

Coop Training | 6 months 10 Jun 2024 – 10 Dec 2024

- Designed and developed an internal login form using Excel integrated with a database and simple Visual Basic for Applications (VBA) logic
- Created structured digital forms via Oracle APEX to improve internal processes
- Applied fundamental cybersecurity practices during technical tasks
- Worked independently on all assignments and gained valuable experience in planning, ownership, and time management

#### Technical & Web Tasks – Tamheer Program | Perfect Presentation (2P)

- Provided Application Support in a real production environment using ITSM tools (Ivanti)
- Analyzed system workflows and designed Data Flow Diagrams (DFD)
- Documented internal systems for SDAIA-related tasks
- Worked with Oracle test environments to process system requests
- Gained exposure to [ASP.NET](#) Core (.NET) and application architecture
- Built foundational knowledge in Software Testing (QA) and Frontend concepts
- Collaborated with developers to troubleshoot issues and improve system performance

### EDUCATION

#### University Of Hail | Saudi Arabia

Bachelor's degree in Software Engineering | 2020 – 2025

- GPA 3.033/4.0
- Built multiple academic-level projects including:
  - CV Filtering System (Graduation Project) – A web-based system using HTML, CSS, PHP, and MySQL to help HR departments evaluate candidates based on specific criteria.

### COURSES

- Foundations of Software Testing and Validation – Coursera
- Certificate of Achievement in Artificial Intelligence Concepts and Advanced Applications – SDAIA
- Membership Certification from the Saudi Council of Engineers – Category: Specialist – Specialization: Software Engineering
- Cybersecurity Fundamentals – Satr Platform
- Introduction to Game Design – Remote workshop, Programming & Gaming Club
- Game Development Basics – Remote workshop, Programming & Gaming Club
- C# Fundamentals (101, 102) – Satr Platform
- ASP.NET Core MVC – Satr Platform

### OTHER

#### Technical Skills:

- Software Testing (QA) Fundamentals
- ITSM & Help Desk Systems (Ivanti)
- Frontend Basics (HTML, CSS)
- [ASP.NET](#) Core MVC
- Troubleshooting & System Analysis
- Oracle & Database Fundamentals

**Soft Skills:**

- Problem-solving mindset
- Analytical thinking
- Attention to detail
- Continuous self-Learning
- Communication Skills

**Languages:**

Arabic – Native

English – IELTS 5.0 (Intermediate)
