FATEN ALJOHANI

Software Engineer | Software Development | Software Testing & QA

Al Madinah, Saudi Arabia | +966 56 223 2550 | fataljohani60@gmail.com | Portfolio

PROFESSIONAL SUMMARY

Software Engineering graduate with hands-on project experience in web development and software testing. Built projects using ASP.NET Core MVC and PHP/MySQL and documented manual and API testing with Excel, Jira, and Postman. Supported municipal applications through user assistance, technical documentation, and coordination with development teams. ISTQB CTFL-certified.

TECHNICAL SKILLS

Development: C#, ASP.NET Core MVC, PHP, HTML, CSS, JavaScript, Git/GitHub

Databases: SQL fundamentals, MySQL, SQL Server, Oracle APEX

Testing & Tools: Manual and functional testing, test case design, API testing (Postman), regression testing, Jira, Excel

Analysis & Documentation: SDLC, requirements documentation, user guides, system inventory

Professional Skills: Communication, cross-team coordination, problem-solving

EXPERIENCE

Perfect Presentation (2P) | Al Madinah Municipality Oct 2025 - Apr 2026

Application Support Specialist | Tamheer Program (6 months)

- Handled application-support requests for municipal systems and documented reported issues and follow-up actions.
- Classified Oracle and web application requests and coordinated troubleshooting with developers and technical teams.
- Prepared internal user guidance and contributed to system inventory documentation for municipal applications.

Prince Sultan Armed Forces Hospital | Communications & IT Jun 2024 - Dec 2024

Software Engineering Co-op Training

- Developed an internal login form using Excel as a data source and VBA for application logic.
- Created Oracle APEX forms for internal processes and applied basic cybersecurity practices during technical tasks.

SELECTED PROJECTS

E-Commerce QA Testing | Automation Exercise Manual & API QA

- Documented 13 manual test cases across registration, authentication, product search, and shopping cart; recorded outcomes in Excel and Jira.
- Built a Postman collection with 4 API test scenarios and 8 passing final assertions, including negative tests and response validation.

Proofolio | Software Engineering Portfolio ASP.NET Core MVC

- Developed and deployed a portfolio website documenting SDLC stages from planning and requirements through implementation and QA, including 8 portfolio test cases.

CV Filtering System | Graduation Project PHP / MySQL

- Developed a web application for candidate screening using HTML, CSS, PHP, and MySQL, with CV uploads and criteria-based matching.

EDUCATION

University of Hail | Bachelor of Software Engineering | 2025

CERTIFICATIONS & COURSES

ISTQB Certified Tester - Foundation Level (CTFL) | Saudi Council of Engineers - Software Engineering Specialist

ASP.NET Core MVC & C# Fundamentals (Satr) | Foundations of Software Testing and Validation (Coursera)
